The screenshot displays the Land Change Modeler software interface. On the left, there are several configuration panels for 'CO2 emission within the REDD project' and 'Non-CO2 emissions within the REDD project'. The main area shows three maps of Madagascar, labeled 'Madagascar Landuse 2005', 'Madagascar Landuse 2020', and 'Madagascar Landuse 2035', illustrating land use changes over time. A legend for each map identifies Forest (green), Non-Forest (red), Water (blue), and Cloud (grey). Below the maps is a data table titled 'Table 19: Ex ante net anthropogenic GHG emission reduction (C-REDD)'. The table provides a detailed breakdown of CO2 and Non-CO2 emissions and reductions from 2006 to 2035, categorized by Carbon Baseline, Carbon Leakage, and Carbon REDD.
